EMMANUEL L. MOISE
SUPERVISORY PATENT EXAMINER

Art Unit: 2137

DETAILED ACTION

1. Claims 117-136, 139-144, 146-165, 168-174 are pending.
2. Amendment filed 10/19/2006 has been received and considered.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Anthony Moosey on 11/14/2006.

The application has been amended as follows: replace claim 164 as presented below.

Art Unit: 2137

164. (Currently Amended) The article ~~The computer program~~
~~product~~ of claim 163 wherein the vulnerability has an associated
action resulting in exploitation of the vulnerability.

Art Unit: 2137

Allowable Subject Matter

4. Claims 117-136, 139-144, 146-165, 168-174 are allowed.

5. The following is an examiner's statement of reasons for allowance: The claims relate to pruning an attack tree. The general idea of pruning an attack tree is known as taught by the previously cited prior art. However, the prior art does not teach the specific pruning method of the claims, specifically each edge having a transition value corresponding to a type of vulnerability and that the edge and node are only included in the graph when another edge, having a second transition value corresponding to one of the plurality of vulnerability types, does not connect an ancestor of the current node to another node having a second state equivalent to the first state; and the second transition value is equal to the first transition value.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion
